PORT PILATES

PRODUCT CATALOG

“quality and healthy life”

Greetings,

Port Izmir A.S. is an international trade organization operating in Turkey.

We operate Pilates Studios, organize Academic trainings and manufacture Equipment.

We have combined all our experience in the sector with the Port Pilates® brand.

In Turkey; we produce the world's highest quality and reliable, first class Pilates equipment.

We would be pleased to review our products.

Best regards
Port Pilates Systems

COMBO CADILLAC REFORMER

Combo Cadillac Reformer is a versatile and innovative piece of equipment that combines the features of Pilates Cadillac and Reformer. It allows you to perform hundreds of exercises from both modalities with ease and comfort. Combo Cadillac Reformer is ideal for studios, clinics and home users who want to save space and money without compromising on quality and functionality.

The Combo Cadillac Reformer is made of durable and sturdy materials such as solid beech wood, stainless chrome-plated steel. It has a smooth and quiet transportation system, adjustable springs and a padded platform.

Combo Cadillac Reformer also comes with various accessories such as reformer box, jumpboard, trapeze board set.

The Combo Cadillac Reformer is designed to help you improve your strength, flexibility, posture and coordination. Whether you are a beginner or an advanced practitioner,

You can benefit from the versatility and challenge of the Combo Cadillac Reformer.

PERFECT MOVEMENT

Combo Cadillac is the perfect device that adapts to every movement of your body during Pilates. It offers a fluid and comfortable movement with its superior adjustment options. It also saves space with its special design and can be easily stored.

UNLIMITED SETTING OPTIONS

Combo Cadillac allows you to control the pulley angle in the most precise way with its extended gear options. Thus, you can adjust the spring resistance you want in your Pilates exercises and work according to your body's needs. Reformer is also compatible with Mat use and enriches your Pilates experience. Reformer, Mat use.

For a quiet and comfortable ride, 8 specially manufactured wheels and bearings on the carriage ensure a quiet and comfortable movement of the bearing carriage. Wheels and bearings help to reduce friction and minimize noise.

Durable and high-quality aluminum rails ensure the bearing carriage is durable and long-lasting. Aluminum rails are resistant to rust and corrosion. They are also lightweight, which makes the bed carrier easy to transport.

The long wide mat mattress and the sliding mattress covered with orthopedic foam of the same width increase the comfort of the mattress carrier. The sliding mattress covered with orthopedic foam supports the user's lumbar and back health.

The springs are special steel coil production with different resistances for each color, making it even easier to adapt the carrier mattress to the user. The different resistance of the springs allows the user to adjust the firmness of the mattress carrier according to their weight and preferences.

Overall, these features make the mattress carrier comfortable, durable and user-friendly.

There are 5 springs in the carriage.

Adjustable rollers.

Adjustable hood, shoulder pads and foot bar.

3 different gear options for each spring.

The included Box and Springboard are included in the comprehensive list of accessories.

The buckles used are of high quality and tailor-made.

HIGH QUALITY MATERIALS

The solid wood used in the body is cut with CNC Technology. Thus; Robust and Aesthetic material has been obtained. All materials from the smallest materials used up to the steel bolts of the wheels under the carrier were produced and used as a result of detailed R&D studies.

30mm thick solid beech wood is used in the body.

Wooden wedges are used instead of iron screws in order not to spoil the properties of the wood. Wooden accessories are made of hornbeam wood.

Carrier pipes are made of 2mm thick 100% chrome material in order to be suitable for high weight bearing and durable.

Lock and connection apparatus are special casting production.

Grip Sponges do not sweat or slip. The buckles used on the handles and other fabrics are high quality and specially sewn.

PRODUCT FEATURES - TOWER REFORMER
